Company Announcement: New Capability in Infant Cereal, Dairy and Nutritional Products Low Oxygen Pouches – Australia & China

February 6th 2019

I am pleased to announce that we have extended our capability with **leading technology low oxygen shelf stable** blending and packing solutions for **re-sealable stand-up retail pouches** (doy packs).

This new capability follows 3 years of development in high speed low oxygen dairy powders. Our services now include:

- Dairy and functional powder high-care licence (#5381 – includes China CNCA)
- Low oxygen medium-care infant cereal packing suite
- Low oxygen high-care dairy suite

Our low oxygen capability provides the opportunity to further enhance product quality and freshness throughout the duration of the foods shelf life. Product examples include:

- Organic certified infant cereals
- Dairy (milk) powders
- Protein or supplementary powders / superfoods

This new capability complements our existing single serve sachets, tins, tubs and bars for the above categories.

We are very proud of what our engineering, R&D, quality and operations teams have achieved throughout extensive trials, learnings and successful outcomes. ANNEX Foods will continue to develop our expertise in the dairy & nutritional and health food categories and look forward to further announcements in the near future.

All enquiries regarding new capability should be directed to Sales Manager Jeff Yeates – via +61 3 8551 1847 or jeffy@annexfoods.com.au.

Sincerely

Kane Fetterplace
Managing Director
